Course Abstract for

DESIGN ENGINEERING – 1A

(3rd Semester)

Course Initiated by:
Centre for Industrial Design
(OPEN DESIGN SCHOOL)

For any query, please write us at: design@gtu.edu.in
**Design Engineering – 1A (3130008) (3rd Semester)**  
**Module 1: Understanding Design Thinking**

Name of the Discipline & the Programme: *Every discipline of the Engineering*

Course category: *Compulsory/Core - Basic*

Examination Pattern: *Internal evaluation/viva at the end of semester*

Prerequisites: *Optimistic mind-set, Enthusiasm of learning new things, Unlearn yourself*

**Relevance**

This course is meant for beginners. The course is designed to imbibe Design Thinking understanding and mind-set for the 3rd semester students.

**Objective: Understanding Design Thinking**

The course aims to expose students to the basic process and framework of Design Thinking and relevant tools & techniques for Creativity & Innovation.

**Course Contents**

This Course is designed to give very basic understanding of the Design Thinking methodology. In DE-1A, student will select *very basic and small, individual or team project irrespective of their branch*. This project would be from very general topic/domain like designing something for yourself/parents/Teacher/Friends (Whole class may select single project topic or similar topic in different small groups to have healthy competition among the class). This kind of basic project in 3rd semester would help in understanding of Design Thinking process easily when much technicality is not involve. *In this module, student will use whole Design Thinking process as shown in fig.1 of general guideline document to complete their projects but here the learning objective or focus would be more on Observation or Empathy process.* So students need to give more time to these phases and then reach up to the rough prototype phase. The content is divided into week-wise activities as shown below to better understand the course and to give enough time to all the learning aspects and students need to follow the same but depending upon the type and nature of projects, students and guide may allocate more/less time to the activities.
# Open Design School

**Design Thinking Process – with Tools & Techniques**

</tbody>
</table>
| **Design Thinking Introduction** | 1 | o Overview, objective and goal of this course  
  o What is Design Thinking? - Its importance, socio-economical relevance  
  o Design thinking to foster innovation  
  o Relevance of design and design thinking in engineering  
  o Systematic problem identification & problem solving approaches | o Brief lecture/exercise  
  o Hands on exercise to understand attributes of Design Thinking |
| | 2 | o Domain Selection (general topic/products in 3rd semester)  
  o Team Building Exercise  
  o Log book, documentation strategy – introduction, importance, preparation | o Brief lecture/exercise  
  o Hands-on sessions with cases/examples  
  o Individual logbook is required |
| | 3 | o Learning tools  
  ✓ Design in nature/Bio-mimicry  
  ✓ Design as a System approach  
  ✓ Design as listening tool for mapping users’ unmet needs | o Brief lecture/exercise  
  o Next week Students need to present on the learning from these topics |
| **Empathization Phase** | 4,5,6 | o Observation: Through AEIOU framework  
  ✓ Orientation to Field Work – Need for field visit?  
  ✓ What/How/Where to Observe  
  ✓ Ethnographic tools and its usage  
  ✓ What difference it will make if the problem solved - partially or fully?  
  ✓ Could solution be worse than the problem?  
  ✓ Key pain and pleasure points  
  ✓ Understanding of User Contexts  
  ✓ Log book exercise | o Students will be introduced to different observation/scouting methods in the theory session in class for all four weeks in different sessions  
  o Then during weeks, they need to visit their selected domain/place for getting insights and define problems.  
  o Minimum 4-5 field trips will be required to get insights |

For any query, kindly write to: design@gtu.edu.in
Learning Design Thinking at Gujarat Technological University

For any query, kindly write to: design@gtu.edu.in
| Product Development Phase | 11 | Preparation of Product Development Canvas (PDC)  
✓ Product Experience  
✓ Product Functions  
✓ Product Features  
✓ Components  
üş Discusion on Product Development Canvas (PDC) | 2 hour – explanation of product development canvas to class  
Then students will work on their PD canvas (min 3 hour continuous workshop)  
Till 12th week of the course, Students team will discuss on their PDC with other groups and guide  
Refinement of PDC after discussion |
| --- | --- | --- |
| | 12 | Customer/User Revalidation (Reject/Redesign/Retain)  
Refinement | Till 13th week of the course, student team will consult the Users/Stakeholders for their inputs for concept finalization after various stages and incorporate necessary changes. |
| Proof of Concept | 13 | Rough Prototype  
Here strategy is “to fail fast to succeed faster” | Very early & rough prototype  
Made up of paper, cardboard, thermocol etc. whichever material is available |
| Feedback & Final Report | 14 | Upload duly signed Continuous Assessment Card  
Feedback, Online certificate generation through DE portal  
Final Report | As per the feedback received from Users/Stakeholders/other student groups/guide, student teams need to modify their design and further action plan.  
Report writing should be continuous activity throughout the semester |
Submissions by the end of 3rd semester shall be:

A. Process Report comprising:
   a. Introduction (Describe your project in detail including domain – type, place, why and how team selected this domain and why this domain is important in relation to Design Thinking/Human-Centered process etc.)
   b. Preparation of canvases based on different phase of Design Thinking
   c. Feedback analysis with the user shall be clearly included in the report
   d. Summary of findings of Prior Art Search on purpose/project theme (2 summary papers per student)
   e. Summary of the learning from Design Thinking
   f. Summary on validation process and refinement in the rough prototype
   g. Any other important aspects you feel should be included

B. AEIOU framework
C. Mind Map
D. Empathy Map
E. Ideation Canvas
F. Product Development Canvas (PDC)
G. Rough prototype model/Conceptual Plan-Layout for process related branches
H. Individual Log Book (duly signed by faculty guide)
I. Continuous Assessment Card for Internal Evaluation (Document separately available on GTU website)

Note: As per the guidelines and evaluation schemes given in this document, students need to prepare report for their projects. Separate report format will not be provided by University, students and faculty members may create their own creative formats. However, in general guidelines document uploaded on GTU website, there are some report format links are given which may help for report format.
Appendix 1: The END SEMESTER Evaluation Scheme for

Design Engineering-1A (3130008) (3rd Semester)

BE II year – all branches

To,

The Principals/Directors of Colleges/Institutes, the Heads of Departments and GTU/Design Engineering coordinators:

Students deserve a proper practical/ viva/project examination of the work that they have done over the semester (or over the year for a 2-semester project). It is the responsibility of the University and Colleges that all its examinations are conducted fairly, sincerely and with due diligence. So please look into the following:

1. Please make proper arrangements so that all the examinations start in-time. If due to any reason, the exam should not start at the scheduled time, please inform the examiners that they should take extra time. But in no case the viva/ practical exam be conducted in a hurry without giving sufficient time for evaluation of every student. If an exam is scheduled to be held over two days, please make the necessary arrangements.

2. The University expects the Deans (and or special teams headed by the Dean or his/her nominee) to visit the Colleges during the practical/ viva examinations. As it came to University’s notice that some examiners and colleges are completing viva exam in 1 or 2 hours’ time of entire class which is not acceptable in any case and it’s immoral practice for any education institute. So all stakeholders need to take extra care of this issue.

3. Please see that all the necessary help and information is provided to examiner. Please receive them so that they can do their job properly without wasting their time in searching for the place and in contacting the concerned departments and students. If they wish to visit the laboratories/workshops, please make the necessary arrangements.

4. Please inform the examiner that he/she must note down the best 3 projects of the department and convey the details of such projects by uploading the details of the project or/and the complete project report on the University’s server or send it to design@gtu.edu.in.

5. In case Internet or the server should not work, please provide the technical help to the examiner for preparing a CD of the reports of the best three projects of every department and please make arrangements to deliver the CD to the examination/BE section of the University.
PROCESS OF EVALUATION: At the ensuing 3rd semester examinations, the work of the students in Design Engineering – 1A is to be evaluated through Internal Viva exam and the evaluation is to be out of 80 marks. Institute may organize inter-department viva or project show case so students would get various expert opinions to motivate them.

For 3rd semester, internal Viva-Voce examination will be conducted at the end of the semester by a team of three examiners - One internal guide, one inter/own departmental faculty, one industry expert (industry expert may be optional but recommended). Internal examiners/teachers must be trained in Design Thinking through the FDP conducted by University.

EVALUATION SCHEME:

<table>
<thead>
<tr>
<th>Sr. No.</th>
<th>Particular</th>
<th>Sub-Head Weightage</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>

</tbody>
</table>

80
Note:

- Total Marks for the subject: 100 (Internal end semester viva exam – 80 & Internal continuous evaluation – 20)
- Minimum passing marks: 40/80
- Examiner essentially needs to evaluate the learning process of the student during the semester, not only the final outcome. As outcome is important for any project but during the student stage, projects are intended for practical learning and “Learning by doing” is the Mantra for Design Engineering subject (One should celebrate the failure also and learn from it to get success). So please evaluate the Design Thinking process and their learning properly with giving sufficient time for each project.
- Students need to explain all canvases prepared in hard copy to the panel of examiners.
- Power point presentation is not mandatory.

For any query & suggestions, kindly contact course coordinator:

Mr. Karmjitsinh Bihola, Assistant Professor,
Centre for Industrial Design, GTU.
